

1st Symposium Aluminium Forging 2017

12 September 2017

Congress Graz

Scientific Programme

Recent developments in the aluminium forging industry

Advanced and new forging light materials

Advanced and new production technologies

forging, heat treatment, machining

Products for industries

aerospace, automotive, machinery, tooling, transportation, offshore, etc.

Testing and quality management

nondestructive and destructive testing, ISO9000, ISO14000

Plant engineering and equipment

Environmental management

Numerical analysis and simulation
