

Session Program

26-29 Jun 2017

EUROPEAN STEEL TECHNOLOGY AND APPLICATION DAYS 2017 - ESTAD 2017

Rolled Properties and Characterizations

Tuesday 27 June

08:30

Rolled Properties and Characterizations

Session | **Location:** Room 2.91

08:30–08:50

Hot work tool steels strengthened by carbides and intermetallic phases

Speaker

Mr Wolfgang Bleck

08:50–09:10

Real-time 3D reconstruction and defect detection on hot-rolled steel products based on the laser-light-section method

Speaker

Mr Philipp Paier

09:10–09:30

Influences of the changed chemical composition of modern AHSS-grades on the pickling process

Speaker

Mr Caesar Sasse

09:30–09:50

Inline measurement of electromagnetic parameters for characterization of material properties of steel strip with a focus on magnetic values

Speaker

Mr Alois Koppler

09:50–10:10

Review of CRM sensors usable for improved coated products

Speaker

Mrs Genevieve Moreas

10:10
