voestalpine's Strategy for the CO₂-reduced steel production in Austria

Tuesday 20 May 2025 11:30 (30 minutes)

voestalpine as the quality steel producer in Europe has developed a stepwise transition to a CO₂-reduced steel production. Already now voestalpine is able to produce steel with lower CO₂ emissions. In 2027 two EAF's will start operation. With its stepwise transition and hybrid-steel production, voestalpine will keep the quality on the same level as now.

Author: Dr SATZINGER, Kurt (voestalpine Stahl GmbH, Senior Vice President Research & Development and Innovation)

Presenter: Dr SATZINGER, Kurt (voestalpine Stahl GmbH, Senior Vice President Research & Development and Innovation)

Session Classification: Plenary Talk

Track Classification: Energy savings and energy efficiency optimization
