

3rd International Workshop Surface quality of continuously cast products – IWSQ-3

Thursday 12 March 2026 - Friday 13 March 2026

Hotel Weitzer Graz

Scientific Programme

Fundamentals of surface defect formation in casting, reheating and hot rolling

Impact of new upstream production lines on surface quality in continuous casting

Recent developments in mold fluxes and their impact on surface quality

Defect prediction by data analytics, AI applications, numerical simulation and computational thermodynamics

Recent advances in defect analysis, including new sensors and quality prediction systems

The role of caster operation and maintenance, new innovative solutions in continuous casting
